

2nd Symposium on
Hygiene
Disposable
Textile Products

Raw Materials,
Technology
and know how for
Reliable Business in India

Disposable Hygiene Textile Products such as Sanitary Napkins, Baby and Adult Diapers and Underpads etc. evoked widespread interest from the Industry at the '2nd Symposium on Disposable Textile Products' held in New Delhi on the 6th of March 2008.

Playing catalyst to its theme 'Building on Opportunities' the symposium not only highlighted the demand foreseen in India for such products but also enlightened the potential manufacturers with knowledge on technology , raw materials and suitable know how for doing reliable business in India .

Due to the factors such as the growing population, increased health awareness and medical tourism into India the market for disposable hygiene products. is growing at a fast pace. To cater to the inquisitiveness of the Indian businesses in this segment, **GDM** which is a manufacturer of converting equipments for hygiene disposable products & **BCH** which is a service provider to the technical textile and nonwoven industry in India, alongwith a consortium of international companies came together once again after two years to further give boost to this growing sector. Renowned companies, each of them world leaders in their respective fields such as **Huhtamaki** -films and release paper supplier, **Invista**- manufacturer of stretch performance materials, **National Adhesives**- manufacturer of adhesive systems for disposable products, **Nordson**- hot melt equipment supplier, **Optima**- filling and packaging machines supplier and **Sandvik**- manufacturer of cutting equipment made presentations on a wide variety of products and services needed for making better products.

The symposium was very well represented and was attended by decision makers from the industry comprising of current manufacturers and importers besides new entrepreneurs. Also in attendance were the parallel sector companies, global buyers of Indian products and services, industrialists and academicians from R&D institutes, financial institutions, consultants and nonwoven and fibre producers. This Symposium has created further opportunities for discussing the future growth trends of technical textiles with particular focus on hygiene products in India amongst all.

The participating companies reinforced their presence through the **Table Top Displays** of their product offerings. Also the **Networking Sessions** during the event turned out to be fruitful for the attendees as they gained singular experience during their interaction with the experts in this field.
